Description

The new WARP Drive 2.5 offers a sleek compact design with a aluminum housing and an instant backup button. Now you can backup files with the touch of a single button, easy to use backup software is included. The software allows you to select files to backup when you press the button on the Warp Drive. The enclosure (TRI-XHD27E) will allow you to install any 2.5" hard drive up to 100GB or select a pre-configured unit with a 40/60/80GB hard drive. The unit powers directly off the USB port of the computer to minimize the need for an additional power supply. USB 2.0 allows for up to 480 Mbps transfer rate. A stylish carrying case is included and provides extra protection when traveling or on the go.
